BIGQUERY DOCUMENTATION (#)

vast amounts of data in near real time. With BigQuery, there's no infrastructure to set up or manage, letting you focus on finding meaningful insights using standard SQL and taking advantage of flexible pricing models across on-demand and flat-rate options. QWIKLABS

BigQuery for Data Warehousing

Learn best practices for extracting, transforming, and loading your data into Google Cloud with BigQuery.

Learn more → (<https://www.qwiklabs.com/quests/68>)

CODELAB

Preprocessing BigQuery Data with PySpark on Dataproc

Learn to create a data processing pipeline using Apache Spark with Dataproc on Google Cloud Platform. It is a common use case in data science and data engineering to read data from one storage location, perform transformations on it and write it into another storage location.

Learn more → (<https://codelabs.developers.google.com/codelabs/pyspark-bigquery/>)

QWIKLABS

BigQuery For Data Analysis

Learn how to query, ingest, optimize, visualize, and even build machine learning models in SQL inside of BigQuery.

QWIKLABS

BigQuery for Marketing Analysts

Get repeatable, scalable, and valuable insights into your data by learning how to query it using BigQuery.

BIGQUERY DOCUMENTATION (#)

Use cases

Explore use cases, reference architectures, whitepapers, best practices, and industry solutions.

USE CASE

Migrating data warehouses to BigQuery

Learn patterns and recommendations for transitioning your on-premises data warehouse to BigQuery.

USE CASE

Streaming data from Cloud Storage into BigQuery using Cloud Functions

[Migration](#)[Patterns](#)[BigQuery](#)

Learn more → (/solutions/migration/dw2bq/dw-bq-migration-overview)

Learn how to stream new objects from a Cloud Storage bucket into BigQuery by using Cloud Functions.

Learn more → (/solutions/streaming-data-from-cloud-storage-into-bigquery-using-cloud-functions)

BIGQUERY DOCUMENTATION (#)

Visualizing BigQuery data in a Jupyter notebook

Use the BigQuery Python client library and Pandas in a Jupyter notebook to visualize data in a BigQuery sample table.

Learn more → (/bigquery/docs/visualize-jupyter)

Managing healthcare data access in BigQuery

Explains strategies for securing clinical and operational healthcare data in BigQuery.

Learn more → (/solutions/managing-healthcare-data-access-in-bigquery)

Code samples

Dive into coding with examples that demonstrate how to use and connect Google Cloud services.

GOOGLE CLOUD

Client: Create credentials with scopes

Create credentials with Drive and BigQuery API scopes.

GOOGLE CLOUD

Client: Create credentials with application default credentials

Create a BigQuery client using application default credentials.

BIGQUERY DOCUMENTATION (#)

GOOGLE CLOUD

Client: Create with service account key

Create a BigQuery client using a service account key file.
